

# MEET THE **MEDi**

## *THE BEAUTIFULLY RUGGED DIGITAL TOTEM*

Beautiful things aren't always fragile. The new MEDi Digital TOTEM from media mea looks like a work of art, but has an industrial heart - designed, engineered and manufactured to handle all the bumps, knocks and spills that are part of busy public settings like malls, larger retailers, airports, campuses and convention centers.

Put a bright, full HD 42 and 47-inch interactive display totem in the middle of the action to help people look-up information, get directions and learn about promotions and offers.

Your MEDi totems can be custom-branded and color-keyed to your exacting specifications. With a Corning Gorilla Glass protective face and rugged structural materials, MEDi Digital Totems are sturdy and built to last while staying beautiful.
